EXPERIENCE

General Assembly | Full Stack Developer

October 2016 - January 2017

Web Development Immersive 12 week full time course. Built full stack applications collaboratively in a group or solo in a fast paced environment utilizing numerous languages, frameworks, and web development processes.

Projects

univJam | peaceful-wave-95427.herokuapp.com

- Built a full stack application that allows you to create YouTube playlists through their API.
- Built with the MEAN stack using MongoDB, Express, Angular, Node.js, Javascript, jQuery, HTML, and CSS.

PupShare | hidden-taiga-14100.herokuapp.com

- Team of 4 collaborated on a week long sprint to create a site designed for the dog lover who wants to find a canine companion.
- Responsible for the back end, setting up routes, and implementing the Google Maps API.
- Built with Ruby on Rails, PostgreSQL, APIs, HTML, and CSS.

Tipsy Traveller | hidden-sierra-85881.herokuapp.com

- Team of 4 collaborated on a 3 day sprint to create a fully responsive site that allows users to post recommendations and feedback on their travel destinations.
- Responsible for the front end, models, views, and controllers
- Built with Ruby on Rails, postgresSQL, HTML and CSS.

Sindeo | Recruiter

November 2014 - October 2016

- Worked with the Design and Tech team to redesign build the careers page with Javascript, HTML, CSS.
- Hired as part of the initial core team and rapidly scaled the company by 450% through recruitment efforts.
- Promoted within first 6 months to lead all recruiting efforts.
- Drove 100% of the recruiting process from passive candidate sourcing to interview optimization to offer negotiation.
- Primary business partner across departments including tech, product, sales, marketing, and operations.
- 95% positive candidate surveys by consistently optimizing candidate experience through active ATS administration and touch-points.
